

Bio-Zor

BIO-BASED FUNGICIDE

Healthy Plants
Better Harvest

PRODUCT DESCRIPTION

A bio-based crop protection formulation developed using bio extracted from selected herbal sources. The formulation is designed to support the management of fungal diseases while helping maintain healthy plant growth, foliage and crop productivity.

The naturally occurring bioactive compounds present in herbal ingredients help create conditions less favourable for fungal development and support the plant's natural defence mechanisms.

Features & Benefits

- **Herbal-Origin Formulation:** Developed using bio extract obtained from selected plant sources.
- **Supports Fungal Disease Management:** Helps in protecting the spread of fungal pathogens as part of an integrated crop-management programme.
- **Supports Natural Plant Defence:** Helps strengthen the plant & natural protective response against disease-related stress.
- **Healthier Foliage:** Helps maintain healthy leaves and supports normal photosynthetic activity.
- **Improved Plant Vigour:** Supports healthy vegetative growth and overall crop development.
- **Crop Quality & Yield:** By supporting healthier plants, it helps maintain crop quality and productivity.
- **Broad Crop Suitability:** Suitable for use in disease-management programmes across vegetables, fruits, field crops and floriculture crops.
- **Botanical Approach:** Provides a plant-derived option that can complement conventional recommended crops.

Recommended Crops

Suitable for use on:

- Grapes
 - Chilli
 - Tomato
 - Vegetables
 - Cotton
 - Fruits
 - Flowers
 - Pulses
 - Cereals
 - Plantation
- Crops and other agricultural crops

Dosage

2 ml/L to 5 ml/L
