

Maximos

**For Enhanced Crop Growth
and Higher Yield**

Maximos is a specially formulated product developed using advanced technology to provide crops with maximum bioavailability, tolerance, and safety.

Benefits of MAXIMOS

- ☞ Maximos helps to control flower drop effectively
- ☞ Maximos provides organic nitrogen, which helps crops absorb nutrients quickly and efficiently.
- ☞ It plays an active role in the respiration process of plants.
- ☞ It helps crops overcome various stress conditions.
- ☞ It helps stimulate energy metabolism in plants.
- ☞ It provides a readily available and rapidly absorbable source of nutrition.
- ☞ It supports pollination and fruit setting.
- ☞ It helps activate plant hormones and other growth-promoting factors in crops.
- ☞ It increases chlorophyll content in leaves and helps enhance the process of photosynthesis.
- ☞ It is beneficial for improving crop growth and productivity.

Dosage

Mix 150 grams of Maximos in 100–150 litres of clean water and apply as a foliar spray. Two applications are recommended during the peak growth stage of the crop.

Recommended Crops

Cotton, Grapes, Chilli, Vegetables, Fruit Crops, Flower Crops, etc.
